

*Attorney Docket No.: 413450***REMARKS**

Claims 1-34 are currently pending in the instant application. Through this Amendment, claims 2-4, 7-12, 14-16, 18-19, 21, 23-27, and 30-34 have been canceled. Claim 1 has been amended to include all of the limitations of claim 2; claim 13 has been amended to include all of the limitations of claim 16; claim 22 has been amended to include all of the limitations of claim 24. Claims 5, 17, 20, and 28 have been rewritten in independent form with the changes noted below. As such, claims 1, 5-6, 13, 17, 20, 22, and 28-29 remain in this application with claims 1, 5, 13, 17, 20, 22, and 28 being independent.

The specification has been objected to because claims 1 and 13 recite "vent means disposed...within the goggle support means" and "vents disposed...within the support arms", respectively. The examiner has suggested that the noted limitations in claims 1 and 13 cannot be found in the specification. Claim 22 similarly claims "vent means disposed...within the support means". These limitations have been removed from claims 1, 13, 22, and all of the claims that have been rewritten in independent form (i.e., claims 5, 17, 20, and 28). Therefore, the Applicant respectfully requests withdrawal of the current objection of the specification.

The drawings have been objected to under 37 CFR 1.83(a) as not showing vents disposed within the goggle support means and vents disposed within the support arms. As noted above, these elements have been canceled from the claims. Therefore, the Applicant respectfully requests withdrawal of the current objection to the claims.

The examiner noted that the remaining claims would be allowable if rewritten in independent form in the Office Action mailed 3/15/2006. As noted above, all of these claims now appear in independent form or depend from an amended claim, and the limitations "vent means disposed...within the goggle support means", "vents disposed...within the support arms", and "vent means disposed...within the support means" have all been removed wherever they appear in the claims to overcome objections to the specification and drawings. The Applicant respectfully contends that these canceled limitations were not material to (i.e., necessary for) patentability, and that the remaining claims are patentable over the prior art as they currently stand. Therefore, the Applicant respectfully requests (1) the withdrawal of all remaining rejections and objections, and (2) the allowance of the remaining claims.

Attorney Docket No.: 413450

CONCLUSION

In view of the above, the Applicant respectfully submits that Claims 1, 5-6, 13, 17, 20, 22, and 28-29 are patentable. The Applicant requests (1) the withdrawal of the current rejections and objections, and (2) the allowance of claims 1, 5-6, 13, 17, 20, 22, and 28-29.

The fee of \$400 for four additional independent claims in excess of three for a small entity is enclosed herewith. The Applicant believes no other fees are currently due; however, if any fee is deemed necessary in connection with this Response, please charge Deposit Account No. 12-0600.

Should the examiner believe that issues remain outstanding, the examiner is respectfully requested to call the Applicant's undersigned attorney in an effort to resolve the same and advance this application to issue.

Respectfully submitted,
LATHROP & GAGE L.C.
